

Visualizing the Macromolecules

Directions:

- 1) Label each picture with one of the following terms: **amino acid, polypeptide, full protein, triglyceride, glucose, starch, nucleotide, DNA, fatty acids, glycerol**
- 2) Circle each picture with one of the following colors based on the macromolecule type: **Protein (red- think meat), Lipid (yellow- think butter), Nucleic Acid (green – think gene), Carbohydrate (gray – think sugar)**
- 3) Place a **smiley face (☺)** next to the **MONOMERS** and a **star (*)** next to the **POLYMERS**.
